

Hopefully, you will enjoy the friends waiting for you outside.... They don't say much, but they're happy to see you!

Come on in to the lobby, where you'll find Jimmy, Janelle, Bill, or Reggie waiting to help you sign in and direct you to Suite 140.

You bend around a few corners to find us at the end of the first floor hallway.

Once inside, we encourage you to make yourselves comfortable in the waiting area.... hang up your coat, find a comfortable seat, or grab a drink, reading material, or a toy.

At the time of your appointment, we will come out to greet you. Offices are maintained as bright, clean, but mindfully distraction-reduced settings to facilitate testing.

Privacy and concentration are maximized by air purifiers performing double duty and sound machines.

We do our best to preserve a healthy environment for all. This includes encouraging sick clients to stay home, periodically wiping down furniture, toys, and children's books, and keeping hand sanitizer accessible.
